

With DataWare™ Web, you can finally **take control** of your own destiny and answer the most critical questions concerning dealership data today:

- **Who** is getting data from your dealership and DMS?
- **What** information are they getting?
- **When** are they getting it?

DataWare™ is installed **by you** the dealer on a PC within your secure network. No more modem numbers to give out. No more VPN access to grant. No more user IDs and passwords to setup, administer, or worry about. DataWare™ Web is **your agent acting on your behalf**. You tell it what data to send to whom, when and for how long. It's as simple as that. Microsoft.Net framework-designed... secure data pushes using the highest American Encryption Standards (AES).

Best of all, DataWare™ Web is DMS-agnostic, and can work with any Dealer Management System (DMS). Dealers should make the decision as to who gets your data and on your terms... **not anyone else including the DMS providers.**

HOW TO GET YOUR FREE COPY OF DataWare™ Web

1. You will need an authorized user name and password to download DataWare™ Web to your PC. You can send an email to customersupport@vinplus.com or, call our help desk at 1-877-401-7919. In either case, you must provide your dealership name and phone number so that we can authorize the sign-up.
2. Navigate your internet browser to <http://dataware.vinplus.com>.
3. Login and follow the instructions to download the software.

You are now ready to enjoy participating DataWare™ Web-enabled programs, such as **CARFAX® ServiceLink™** and others, or provide any standard DataWare™ data schemas, such as inventory, F&I, deal, service, or parts information, to business partners of your choice.
